## “International Call for

### Ceasefire and Protection of Civilians in Gaza”

Mr. Qaiser M. Siddiqui, the Co-founder and Chief Executive Officer of Inspire Pakistan, expresses his profound concern regarding the heart-wrenching situation in Gaza, Palestine. The present circumstances have resulted in the tragic loss of innocent lives, widespread suffering and a dire humanitarian crisis. It is imperative that all parties embroiled in this conflict halt hostilities, prioritize peaceful dialogue, and safeguard the well-being and safety of those affected.

We passionately implore all stakeholders to commit to achieving a lasting and equitable resolution through diplomatic channels and negotiations. The global community should come together to lend support and facilitate these endeavors. We hold hope that this plea for a ceasefire and the protection of civilians will serve as a significant step towards a more serene and secure future in the Middle East region.

In solidarity with all those impacted by the conflict, we call upon the international community to bolster the initiatives for a peaceful resolution. We firmly believe that the Israeli-Palestinian conflict can only find resolution through a negotiated two-state solution, aligning with the relevant UN Security Council resolutions. Such a solution would enable Palestinians and Israelis to coexist in peace, security, and with the dignity they deserve. It is our earnest wish that all parties find a path to work together towards this pivotal goal.
